Property Restoration

National Fuel will perform surface restoration where the service line is within public right-of-way. Customer will be responsible for surface refinishing, restoring lawns, shrubbery, driveways, or walkways, and the repair of any damage to unmarked underground facilities which occur as a result of the service installation.

NOTE: Following a service investigation, a proposal detailing any payment required and an application for the new gas account will be delivered to you. When you apply for your meter, please be advised that it cannot be installed and turned on until the service line piping has been installed and the house piping is in place. Also, in PA only, you or your contractor must provide written proof to National Fuel that the building or structure passed the inspection required under the uniform construction code.

A security deposit may be required before the gas meter is installed.

Please allow four to six weeks for installation.
