

# ATTENTION:

**All Customers Who Currently or  
Will Purchase Natural Gas Commodity  
through a Third Party Natural Gas Supplier**

## **Change in Termination Rules:**

National Fuel Gas Distribution Corporation's ("National Fuel") customers have the option of purchasing their natural gas supply from either National Fuel or from a third party natural gas supplier ("NGS").

Historically, under certain circumstances, customers who purchased natural gas supply through an NGS may not have been subject to termination of delivery service by National Fuel for failure to pay NGS supply charges.

(over)

Beginning on July 15, 2010, all customers who receive a single monthly bill, consume less than 1000 Mcf/year and purchase natural gas commodity from an NGS should be aware that they are subject to the same termination procedures whether they purchase their natural gas service from National Fuel or the NGS. A typical residential customer consumes less than 100 Mcf of gas per year. **If you do not currently purchase your natural gas commodity from a NGS, there is no change to your current service.**

As always, any termination actions taken by National Fuel will be done in compliance with the laws of Pennsylvania and pursuant Pennsylvania Public Utility Commission's rules and regulations.
