*Choose natural gas...the convenient,  
clean and economical choice.*

*Natural gas grills...  
the most convenient way to grill.*

Enjoy the ultimate in convenience and performance with natural gas grilling. There's instant on/off, no ash and no tank to refill—all for less money than propane, charcoal or electricity. Cooking outdoors on a natural gas grill also reduces heat in the kitchen, which cuts down on air conditioning during the summer months.

*Enjoy the warmth  
and coziness  
of a natural gas  
fire pit.*

Natural gas fire pits combine the warmth of a campfire with the convenience of clean-

burning natural gas. They also don't burn wood or emit soot into the air, making them better for the environment than wood-burning campfires or fireplaces. Best of all, they require little or no clean up because they don't leave behind ashes. Just grab your friends and gather round.

*Get started today.*
